

Rocket CYCLE

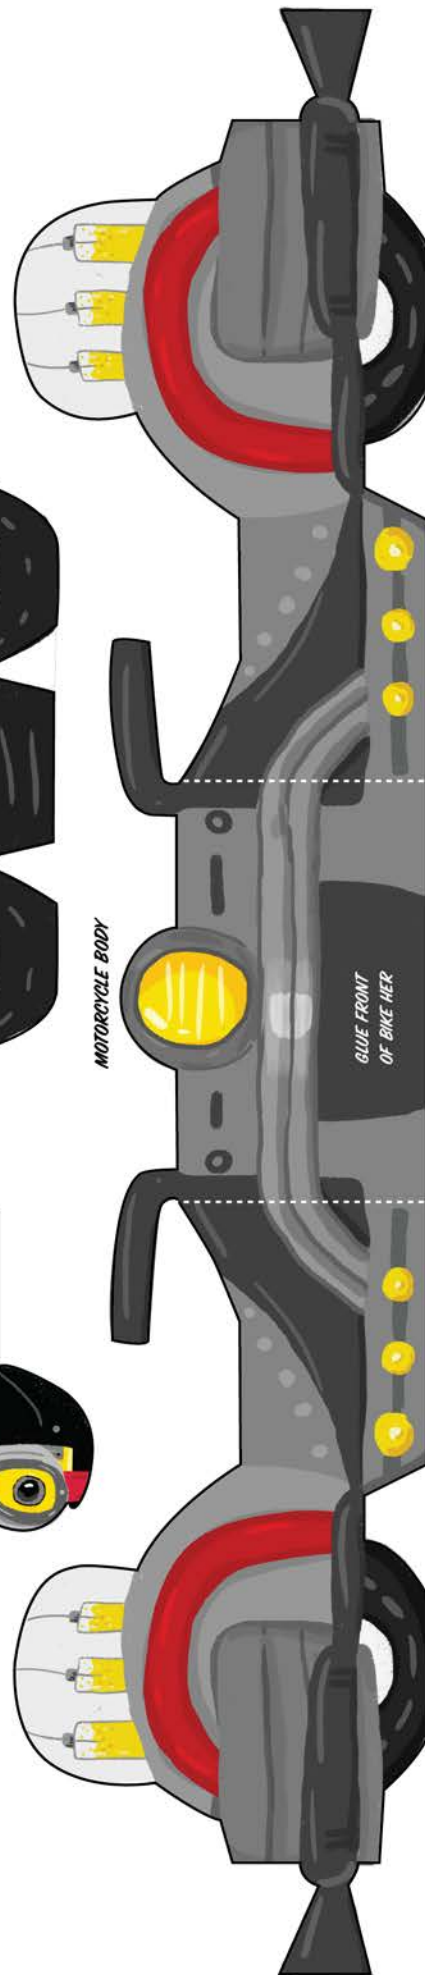

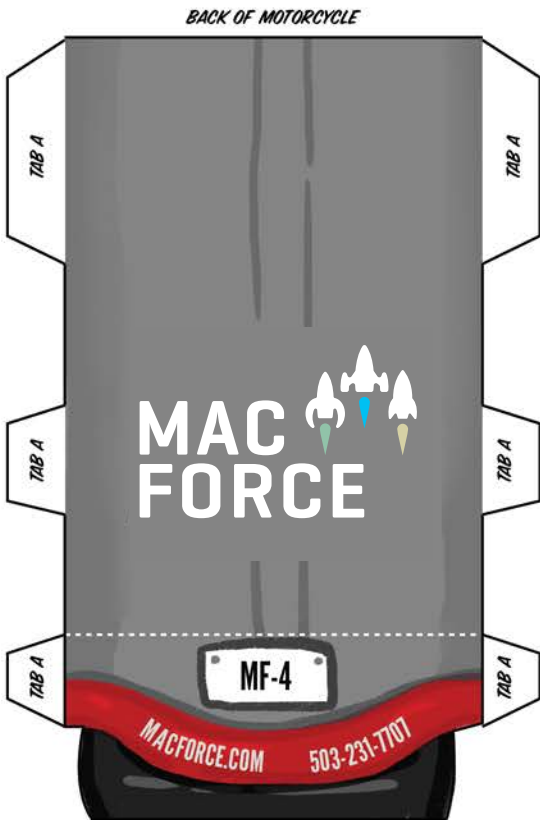

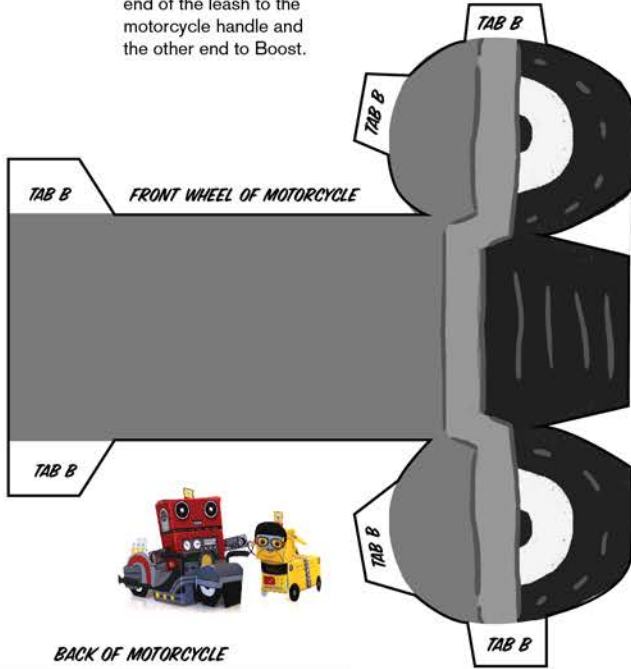

1. Cut along the solid black lines. With the back of a butter knife, score the dotted lines and fold.

2. Glue 'A' tabs to the inside back of the motorcycle body.

3. Glue 'B' tabs to the front of the motorcycle body forming the front wheel.

4. Place retrobot inside the motorcycle and enjoy!

5. You can also include Boost by fastening one end of the leash to the motorcycle handle and the other end to Boost.
